

# MHEG-5 Browsers and Interactive Engines

*The ultimate software solution to make your device interactive with MHEG-5 support*

## Customer Benefits

- Reducing risks by leveraging state of the art MHEG-5 software components which are robust, reliable, deployed, and certified
- Accelerating time-to-market by integrating MHEG-5 software component with efficient porting, integration, and validation tools and processes
- Preparing for the future by relying on the MHEG-5 offering of a software publisher committed to ensuring its solutions remain compliant with changes to the relevant standards and to guaranteeing interoperability with the various (existing and to be released) MHEG-5 applications
- Minimising the learning curve by sharing iWedia expertise in the field of MHEG-5
- Managing the integration project thanks to access to “à la carte” iWedia professional services

# Products

- **CI Plus Browser V1.2**
  - Compliant with CI Plus Specification V1.2
- **CI Plus Browser V1.3**
  - Compliant with CI Plus Specification V1.3
- **MHEG-5 1.06 Broadcast Interactive Engine**
  - Compliant with DTG D-Book 5.0
- **MHEG-5 2.0 Broadcast and Broadband Interactive Engine**
  - Compliant with DTG D-Book 6.1

# Packaging

- **MHEG-5 browser or engine:** library
- **Driver-level API (aka Hardware Abstraction Layer - HAL):** API documentation, reference implementation (ANSI C source code), validation tool (test suite) (ANSI C source code)
- **Service-level API:** API documentation, validation tool (test suite) (ANSI C source code)
- **Integration guidelines**

# Options

- **MHEG-5 browser or engine source code**

# "A la carte" Professional Services

- **Training and getting started session**
- **Porting on target platform**
- **Integration within final product**
- **Validation of final product**
- **CI Plus and/or DTG pre certification of final product**
